

11 April 2022

This letter is to confirm that Raghav Agarwal is employed at ABN AMRO Clearing Sydney from 20<sup>th</sup> December 2021 to 14<sup>th</sup> April 2022.

Raghav joined ABN AMRO Clearing as a Junior Python Developer. During his employment, Raghav worked on a global regulatory reporting project. This project required Raghav to deliver a Python solution to transform data from various sources and format them into a pre-defined output file. The solution includes, but not limited to, the below.

- a) Project creation in source repository.
- b) Usage of Python virtual environment.
- c) Common Linux commands, e.g. chmod and vi.
- d) Reuse of existing Python modules and environment variables.
- e) Database connectivity and queries.
- f) Logging.
- g) Unit testing.
- h) Avoid common security vulnerabilities like SQL injection.

Raghav is a pleasure to work with. He is always open to new challenges and guidance. He completed several self-learning on topics listed above. When facing challenges, Raghav relentlessly tries different solutions before reaching out to senior developers for advice. Raghav has great technical potential. With time and increased experience, I trust Raghav will become an outstanding developer and a valuable asset to his employer.

Yours Sincerely,

An Chi Chen

Head of Software Development, APAC
